

Technical Datasheet

rNuQ H3R26Cit Recombinant Mononucleosome

Part number: NUC0032

Species: Human

Source: *E. coli* and synthetic DNA

Description:

Recombinant nucleosomes were assembled *in vitro* using a 147 bp of 601 [1] positioning sequence DNA and four core histones (H2A, H2B and H4) purified from *E. coli* inclusion bodies, and histone H3.1 chemically synthesized as H3R26Cit. This histone contains citrullination at position 26 and a 3 amino acid substitution in the histone core [A47C-C96S-C110A], which is located within the nucleosome core and does not affect nucleosome functionality.

Buffer composition:

Triethanolamine hydrochloride - NaCl - EDTA - Azide.

Applications:

Human recombinant mononucleosomes are suitable for chromatin remodeling and accessibility studies, post-translational modifications (PTM)-specific antibody validation [2], chromatin research [3], as well as nucleosome binding assays in drug discovery and high-throughput screening (HTS) applications [4,5].

Validation data:

Figure 1: Western blot analysis of rNuQ H3R26Cit mononucleosome versus unmodified H3.1 mononucleosome. Lane 1 contains unmodified rNuQ H3.1 recombinant mononucleosomes (200ng; Volition, NUC0001), and Lane 2 contains rNuQ H3R26Cit (200ng; Volition, NUC0032). Probing with an anti-H3R17/26Cit antibody followed by enhanced chemiluminescence (ECL) detection reveals a signal only in the rNuQ H3R26Cit recombinant mononucleosome.

Figure 2: Native PAGE analysis of rNuQ H3R26Cit mononucleosomes. Lane 1 contains the DNA ladder, lane 2 shows free 147bp 601 DNA, and lane 3 shows intact rNuQ H3R26Cit nucleosomes (500 ng). Samples were resolved on a native PAGE gel and stained with Midori Green to visualize the DNA. Intact nucleosomes, in lane 3, display reduced mobility relative to free DNA, consistent with correct nucleosome assembly.

Figure 3: Mass spectrometry analysis of Synthetic H3R26Cit histone. Confirming the expected mass (15,258 Da) matches the observed mass (15,258.5 Da).

Storage and stability:

This product must be stored at 2-8°C and is stable for 6 months from date of receipt. Do not freeze. Use surface optimized tubes (e.g. low bind tubes) and tips for handling and storage.

Precautions:

This product is for research use only. Not for use in diagnostic procedures. Not intended for use in humans or animals.

Gene and protein information:

UniProt ID:

H2A - P04908

H2B - O60814

H3.1 - P68431

H4 - P62805
